Objective

Entry-Level Full Stack / Front-End Developer with hands-on experience in responsive web development and WordPress projects. Skilled in HTML, CSS, JavaScript, Python, Git, and MySQL. Seeking an opportunity to contribute to real-world projects and grow in a dynamic development environment.

Projects

MyStore – Django E-Commerce Web Application
Developed a fully functional E-Commerce web application using Django and Django REST Framework with complete user shopping features and a custom admin management panel. Implemented product browsing, cart system, order placement, and REST APIs for scalable backend integration. Focused on secure authentication, database management, and responsive UI design.
Tech: Django, Django REST Framework, HTML, CSS, TailwindCSS, JavaScript, MySQL, JWT
